

Dr. Kong is Assistant Professor in the Department of Urology of Renji Hospital, Shanghai Jiao Tong University School of Medicine in Shanghai, China. He is a member of the Rare Kidney Cancer Panel of Chinese Anti-Cancer Association. His work is devoted to surgery and comprehensive treatment for patients with renal cancer, especially for those with rare pathological subtypes and hereditary disease. He is also actively involved in translational and clinical research about von Hippel-Lindau disease and fumarate hydratase deficient renal cell carcinoma in Renji Hospital and is a core member of the MDT team for these patients. Dr. Kong was awarded the Cecile and Ken Youner IKCC Scholarship for his work on novel treatment and imaging approaches for fumarate hydratase deficient kidney cancer in 2024.

Full name: WEN KONG
