Biography

Isaac Joseph is a committed public health epidemiologist passionate about enhancing cancer care, particularly in underserved communities. As a research scientist and patient advocate with Move Against Cancer Africa (MACA), he leads efforts in education, awareness, and advocacy for cancer patients. Isaac has conducted patient-centered research and coordinated global surveys to understand the needs of cancer patients in Nigeria. His multidisciplinary work includes diagnostic stewardship and clinical advocacy, promoting early detection, effective treatment, and equitable healthcare access. With a proven history of impactful community campaigns, educational programs, and sensitization initiatives, Isaac addresses critical health challenges like lung and kidney cancers.
